

Our EV-Challenge experience.

Building:

First we started by attaching the wheels, axels and gears then we started the wiring and started to stick it all down on our car. After we started to see the shape of our car, we then raced at school and started to get faster with teamwork.

How the day went

Firstly we got assigned our team number and our car number so, when it was our time to race we were all very nervous but we won our 1st, 2nd, 3rd, 4th, 5th and 6th race, and at the end we won 8. Kevens won 1st and 3rd place and our team the unbeatables won 1st place.

1st
