Ocean rockpool nature tour, Glenrock

Glenrock SCA

Tuesday 7th October, 2024, 2pm to 4pm
Friday 16th January, 2026, 1:30pm–3:30pm

Discovery the amazing world of rockpools along the shores of Merewether and Burwood Beach, on a 2 hr guided tour in Glenrock State Conservation Area. Come along and learn about tidal zones and the different sea life that occupies these harsh environments.

Looking below the surface you'll discover gastropods and bivalves, amazing invertebrate animals encased by a shell. Cunjevoi or 'sea squirt' is exposed to the air for only a few hours a day in the low tide zone – it's a great place for the oyster catchers to catch a meal. We might also find Port Jackson shark egg cases, cuttlefish, fish, crabs, limpets, zebra shells, elephant snails, sponges and coal washed up along the foreshore.

Look out for bottlenose dolphins – they're often seen off the rock shelves, swimming and playing in large groups. Discover how the white-bellied sea eagle uses this coastal area for food and nesting. See if you can spot shorebirds feeding on the rock platforms and pool edges.

Bring non-slip, enclosed shoes that can get wet, a hat, sunscreen and drinking water.

Bookings Essential — Fees Apply
